

Dr. Chernoff Presents on Breakthrough Combination Treatments at the Aesthetic Academy 2018 Annual Conference in Carlsbad, CA November 17-18, 2018.

Dr. Chernoff presented the latest combination approach for non-surgical and surgical treatments to provide maximum results for patients. His lecture highlighted how gravitational decent, loss of volume, and loss of skin tone that plague most patients.

Combining Surface Radiofrequency, Needle Radiofrequency, Fractionated C02 Laser Technology, and Growth Factor Therapy with state of the art surgical techniques, Dr. Chernoff shared techniques to remedy a variety of conditions from head to toe.

Dr. Chernoff’s presentation included case studies how to effectively treat patients.

The Aesthetics Academy educates medical professionals on the latest innovations in the aesthetics industry and certifies practitioners to the highest standards of excellence in medical aesthetics. Dr. Chernoff is honored to be on the faculty for this prestigious and forward thinking organization.
